

Finding a Health Care Company \$700 in Savings

Executive Summary

In 2021, a TX assessor made errors while calculating the personal property assessment on a dialysis clinic. The error was causing the assessment on the clinic to be higher than it should have been.

Challenges

During PVS' review of the assessment, it was noticed that the proposed value was 10% above the rendered value. After a closer look into the assessment, it was determined that the deletions were not removed and the supplies amount was not updated.

Results

PVS was able to secure over \$700 in savings for the client.

How PVS Helped

After contacting the assessor's office and bringing the errors to their attention, the assessment was corrected.

"After contacting the assessor's office and bringing the errors to their attention, the assessment was corrected, saving \$700 for the client."
